BuddhiSetu

A software company that builds and runs its own products in production with real businesses, and when nothing off-the-shelf fits, the same senior team **engineers software around your exact workflows** - from the first workflow map to years of support after launch.

BuddhiSetu at a glance

A quick snapshot of where things stand today - the industries we've shipped into, the platforms already carrying production traffic, and the track record behind them.

10+
PROJECTS DELIVERED

5+
INDUSTRIES SERVED

5+
YEARS IN BUSINESS

3
PLATFORMS IN PRODUCTION

Manufacturing | Workforce & Staffing | SaaS & Support | Retail | Healthcare | Field Services

Deep expertise, built over decades

Our senior engineers bring 15 to 20 years of individual experience across enterprise platforms, cloud and software delivery - the depth that gets complex systems right the first time.

ENTERPRISE ARCHITECTURE

Systems Strategy & Integration

15+ years designing and integrating enterprise systems, including ERP platforms like Oracle ERP - so new software fits cleanly into how your business already runs.

PRODUCT ENGINEERING

Web, Mobile & Custom Platforms

Senior engineers with 15 to 20 years building tailored web, mobile and backend systems from the ground up, not templates stretched to fit.

CLOUD & BUSINESS PLATFORMS

CRM, Cloud & Enterprise Tools

Deep hands-on experience with cloud and business platforms such as Salesforce, set up to match how your teams actually sell and work.

Product makers
We run what we ship.

Tailored solutions
Your workflow first, never a rigid template.

Clear communication
Realistic timelines, no surprises.

Long-term partnership
We support what we build, well after launch.

Software services, when you need more than a product

Integration, custom builds, and the maintenance that keeps them running - the services we deliver wherever an off-the-shelf product isn't the fit.

Enterprise System Integration

Connect ERPs, CRMs and databases into one system - no scattered data.

Web Application Development

Fast, secure, responsive apps and portals - internal or customer-facing.

Software Development

Built from the ground up around your workflows - not bolted onto a template.

Maintenance & Support

Monitoring, updates and support after launch - software that keeps pace.

Platforms already in production

Three products, born from real client operations - multi-tenant, production-hardened, available to your business today.

WorkCrest ERP

End-to-end ERP for manufacturing job shops with GST-compliant invoicing, quote to cash.

- ✓ Multi-level approvals: POs, payments, inventory
- ✓ Ownership-aware inventory: Own vs. Customer-owned
- ✓ GST invoicing
- ✓ Payables and receivables ageing views

ContractForce

Contractor workforce tracking - contracted headcount vs. who showed up, never apart.

- ✓ Real-time roster-based attendance
- ✓ Biometric device ingestion
- ✓ Billing from actuals, not headcount
- ✓ Compliance and audit trail built in

Sathi

Multi-tenant helpdesk with shared inbox, SLA routing and self-serve knowledge base.

- ✓ Load-balanced auto ticket routing
- ✓ SLA engine: on-track, at-risk, breached
- ✓ Internal notes vs. customer replies
- ✓ Volume and SLA analytics

Why businesses trust us with the systems they run on

Support that doesn't end at launch

Proactive monitoring, fast fixes, direct access to the engineers who built your system - not a ticket queue starting from zero.

Software that pays for itself

Aimed at a specific cost or leakage: fewer GST errors, billing that matches attendance, support that scales without headcount.

Built around your process

We model how you operate, edge cases included, then adapt as your process changes.

Quick to deploy

Live on your data in days, in production in weeks - from a working product, not a blank page.

Production-proven

Every pattern here already runs in production, not a slide deck promise.

Transparent pricing

Itemised quotes agreed upfront, no surprise scope creep.

No lock-in

Your data stays yours, fully documented, nothing proprietary.

Low-risk start

A 30-day guided trial before you commit to the full build.

See each platform running on your data

Every product evaluated as a private, fully configured instance - your sample data, your workflows, 30 days to stress-test with real scenarios.

1

Tell us your scenario

A 30-minute call: workflows, users, what success looks like.

2

We configure your instance

Private environment mapped the way you run things.

3

Evaluate with engineers

30-day window with support and a findings walkthrough.

Proven products, custom-built when you need more

Start with a product on your data, or have us build around your workflows. Same senior team behind it, long after go-live.

Talk to us directly

Tell us your scenario. We respond within one business day.
